### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the switching rocker is configured to deform during the transfer from the first position into the second position pyrotechnically or using an electromagnet, as recited in claims 9-11, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Muskat, U.S. Patent No. 3561690.

With respect to claims 1 and 5, Muskat '690 shows a fastening device for a seat belt (106) comprising: a spindle (4), a belt-force-limiting element with a wire-unwinding device which a wire (106') (see column 2, lines 68-72) can be pulled by a predetermined tensile force (see background/summary of the invention), one end of the seat belt is connected indirectly or directly to the wire so that the wire is pulled out of the wire-unwinding device when the retaining force exerted by the seat belt on the occupant reaches the predetermined tensile force, see figures 1-6.

Claims 1-6 and 12-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanabe et al., U.S. Patent No. 5772144.

With respect to claims 1, 5 and 12-13, Tanabe '144 shows a fastening device for a seat belt (w) comprising: a spindle (102), a deflecting roller/rod (44, 45, 61, 62), a belt-force-limiting element with a wire-unwinding device (figure 15) which a wire (43) can be pulled by a predetermined tensile force (see background/summary of the invention), one end of the seat belt is connected indirectly or directly to the wire (43) so that the wire is pulled out of the wire-unwinding device (figure 15) when the retaining force exerted by

the seat belt on the occupant reaches the predetermined tensile force, see figures 13-15.

With respect to claims 2-4, Tanabe '144 shows the wire (43) bends around the deflecting roller/rod (i.e. crank pins 44, 45, 61, 62), see figures 13-15.

With respect to claim 6, Tanabe '144 shows a ratchet ring (41) which can be connected in a rotationally fixed manner via a pawl (111) to the spindle (102), wherein the ratchet ring (41) includes a wire magazine (42 which stores the wire) on which the wire (43) pulled out of the wire-unwinding device (figure 15) is coiled around, see figures 13(a-c).

### ***Allowable Subject Matter***

Claims 7-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
